This lovely Rustic Country House is a sustainable home with rainwater catchment and electric photo-voltaic solar system. It is built with adobe bricks which gives it a great thermo mass (cool in summer and warm in winter). It has a very large passive solar living room .The kitchen and the dining room have an amazing view of the lake including a nice terrace to enjoy your meals outdoors in the afternoons. The sunset views on the lake are fabulous. The master bedroom is also quite large. A good place for someone those like wide open space everywhere. It includes one bathroom, an office, and a studio, or...
