- Size Land: 4,443 ft²

At Villa Octavia, however, it is the relationship between the house and its setting that leaves the lasting impression. The octagonal geometry gives the home its identity; the exposed structure gives it character; the carefully considered proportions create continuity between its spaces; and the western orientation places the changing light of San Miguel directly at the center of daily life. It is a home designed not simply to look outward, but to make the landscape part of the experience of living there.
