MAIN FEATURES

- Ref: 2839
- Bedrooms: 2
- Bathrooms: 1

This lovely Rustic Country House is a sustainable home with rainwater catchment and electric photo-voltaic solar system. It is built with adobe bricks which gives it a great thermo mass (cool in summer and warm in winter). It has a very large passive solar living room. The kitchen and the dining room have an amazing view of the lake including a nice terrace to enjoy your meals outdoors in the afternoons. The sunset views on the lake are fabulous. The master bedroom is also quite large. A good place for someone those like wide open space everywhere. It includes one bathroom, an office, and a studio, or just a storage room. It has a big garden all around. This lovely house is located 20 min driving from Centro San Miguel, and the best of this home is the price:
