Just minutes from downtown San Miguel de Allende, Rancho La Loma is a luxury countryside development set in a safe and peaceful environment, featuring expansive natural areas and amenities that contribute to an exceptional lifestyle. Rancho La Loma was designed with modern sustainability principles and a respectful coexistence with nature. Spanning thirty hectares with only 47 exclusive lots, the development ensures total privacy and independence for each resident, fully surrounded by olive trees, mesquites, and the region's native landscape. The predominance of green areas and common spaces—created for outdoor enjoyment and equestrian living—add to the many advantages and long-term value of this development. Its planning and infrastructure promote the efficient use of all services and guarantee a reliable supply of potable water through a newly drilled well for exclusive use and a reservoir for rainwater collection.
