This large lot (268.90m² / 2894ft²) and with a magnificent view, is located in a growing neighborhood, very close to important locations such as a hospital, plazas, supermarkets and restaurants, among others. The neighborhood is also located in a very quiet area, since vehicle traffic is only that of the neighbors. Another great advantage of this lot is that it is right on the corner of the block, in a location where it allows us to make the most of the orientation of the property.
